

Designation:	2520	Abbreviated:	A-2520
Type:	Spherical		
Base:	Double		
Bulk Density(grams/cc) +/-3.6%	0.985	VMD(cc/grams)	1.015
Bulk Density(grains/cc) +/-3.6%	15.201	VMD(cc/grains)	0.066
Application/Category	Rifle		
Burn Rate sub-category:	Medium		
Typical calibers:	223Rem,30-30Win,308Win,8mmx57Mauser,35Whelen etc		
<u>Information:</u>			

2520 is a medium burning, double-base, spherical rifle propellant designed around the 308 Win. 2520 is our “camp Perry” powder and is extremely popular with many service shooters. It also performs extremely well in 223 Rem with heavy match bullets (62 to 80 grain). This versatile powder has superb flow characteristics and is well within the threshold limit for the M14 systems.

Bulk density/VMD values can vary as indicated (%), please verify all volumetric loads on a scale.
