

Designation:	5744	Abbreviated:	A-5744
Type:	Tubular Extruded		
Base:	Double		
Bulk Density(grams/cc) +/-2.2%	0.920	VMD(cc/grams)	1.087
Bulk Density(grains/cc) +/-2.2%	14.198	VMD(cc/grains)	0.070
Application/Category	Rifle, Handgun		
Burn Rate sub-category:	Extremely fast Rifle: Extremely slow Handgun		
Typical calibers:	<p>Rifle: 45-70Gov,45-120,50-90Sharps and reduced loads all rifle calibers. Handgun: Large capacity handgun calibers from 44Rem Mag to 500S&W for reduced loads, as well as close to maximum performance.</p>		
<u>Information:</u>			

An extremely fast burning, double-base, extruded powder. This unique powder can be used in a wide range of rifle calibers and magnum handguns. It is characterized by excellent ignition and consistency over a very wide performance range. Superior ignition characteristics make 5744 an excellent choice for reduced loads in many rifle calibers and in large capacity black powder cartridges such as the 45-70 through 45-120 and 50-90 through 50-120.

Bulk density/VMD values can vary as indicated (%), please verify all volumetric loads on a scale.
